When: April 8-9, 2017

**Where: 2017 Texas Public Safety Conference
Galveston Convention Center on Seawall Blvd
Hosted by Texas APCO**

Cost: \$1000

Registration: www.team911.com

The General Communications Technician program is customizable “hands-on” instruction modeled after the US Department of Homeland Security (DHS) guidelines that cover all of the disciplines listed in the COMT program and the APCO/ANSI technician standards. This course covers all of the areas that today’s radio communications technician/engineer in the LMR public safety or business/commercial communications field will encounter. This course is designed to include beginners, as well as senior level technicians and engineers. ***Nowhere else will you ever receive this much comprehensive training in such a short time!***

YOU WILL LEARN

- The critical aspects of LMR that you need to know
- Radio theory that is easily understandable
- Hands-On troubleshooting using state-of-the-art test equipment
- All of the technical competencies contained in the DHS COMT
- All core competencies found in APCO / ANSI 3.107.1.2015 communications technicians’ standard
- FCC / FAA rules and regulations

FCC / ETA-I Authorized Certification Administrators
